5 IN 1 Function

Machine comes with mechanical swing arm,
makes it easier for you to use battery welding

What is 5 IN 1 ?

Laser Welding

The primary function is welding. It is designed to join materials together using a high-powered laser beam, ensuring a precise and efficient welding process.

Laser Cutting

Another capability of this tool is cutting. It can be used to cut materials with high precision, making it a versatile tool for various applications that require both welding and cutting.

Laser Cleaning

In addition to welding, this tool can also perform cleaning tasks. It can remove rust, contaminants, or unwanted material from the surface of the workpiece before or after welding, ensuring a clean and smooth welding surface.

Laser Seam Cleaning

Seam cleaning is a specific function related to welding. After welding, the tool can clean the welded seam to ensure a polished and finished appearance.

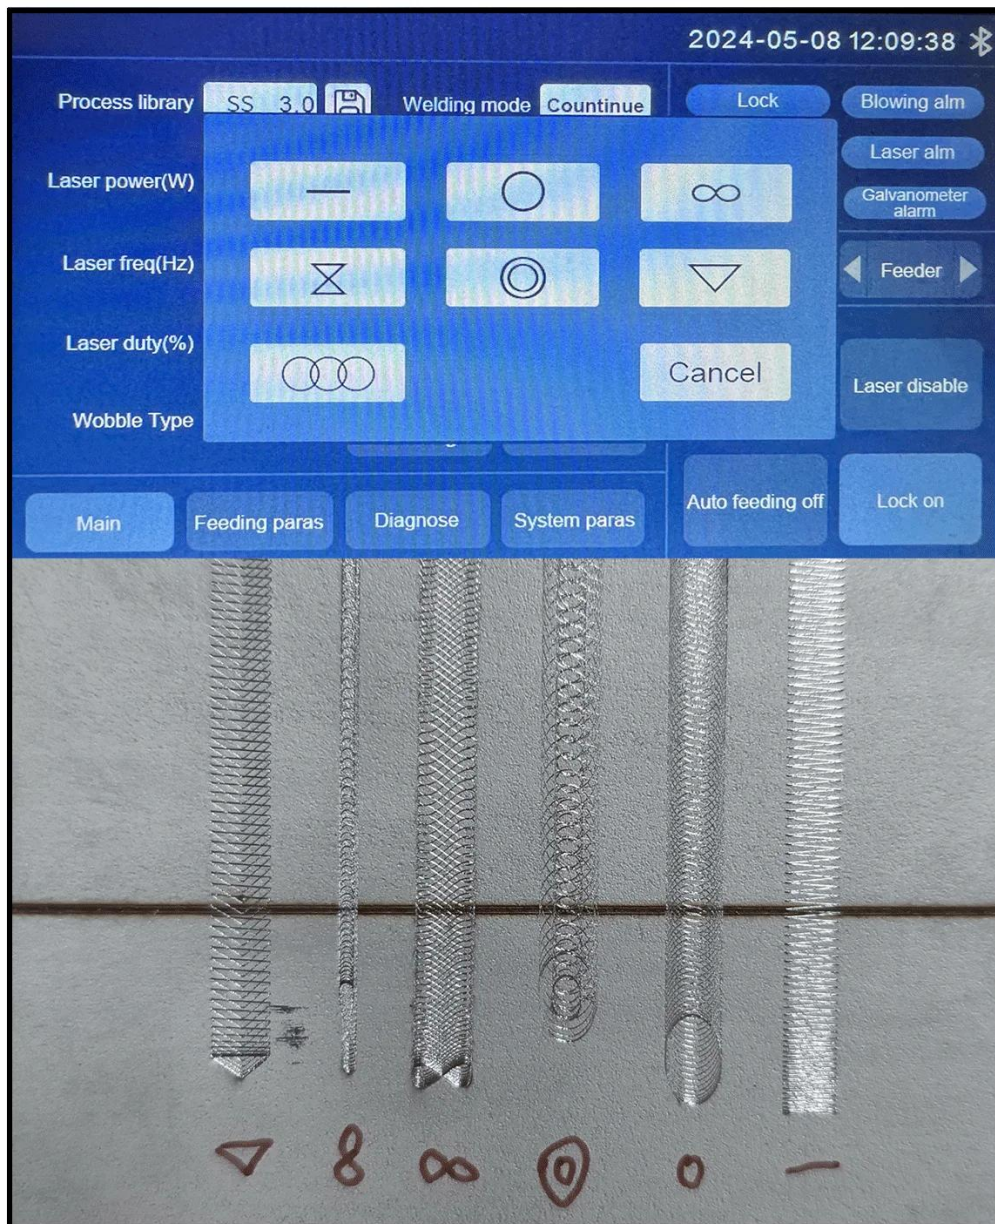

Battery Welding (Energy storage welding)

Application: New energy vehicle maintenance center industry. Dedicated battery welding head to improve efficiency.

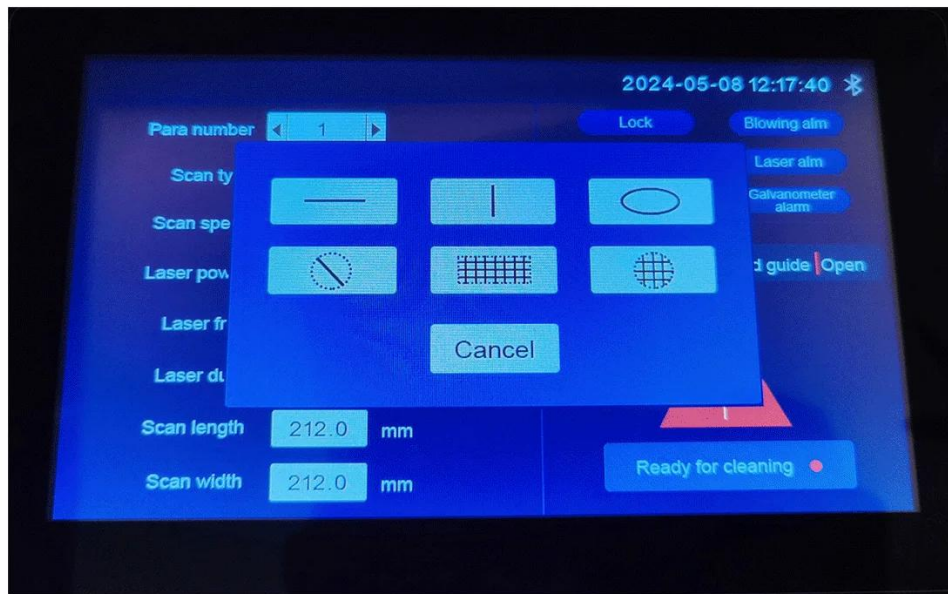

Mainly Packaging List

			
Machine	swing arm	1X Wire Feeding Machine	BWT Laser Source
			
Relfar Display	5 in 1 Laser Welding Gun	1 x Protective Glasses	1 x Protective Gloves
			
8Pcs Welding Nozzle	ER304 Steel Welding Wire	10Pcs Protective lenses	4 Pcs Wire Nozzle
			
1XCable for Laser Souce 1XPower Cable	1Pcs F800 Cleaning lens	Safe Clip	Wrench
