

01 Product Highlight

ChinaCNCzone

ChinaCNCzone Wireless MPG Mach3 CNC Pendant Handwheel for 3 Axis,4 Axis Mach3 [Mini CNC Router](#)

Main features as below:

Using 433MHZ, ISM wireless RF transmission technology, transmit power 10DB, receive sensitivity -98DB

With 64 frequency hopping channels, each channel interval 1MHZ

Intelligent wireless technology, automatic frequency hopping, automatic power saving, automatic ID code learning

The use of frequency hopping transmission, strong anti-interference ability;

Frequency hopping transmission technology, the same room, can support 32 sets of equipment, while the use of each other is not affected

100PPR electronic hand wheel function

Display X, Y, Z, A, four axis mechanical coordinates and workpiece coordinates

Display spindle speed value, processing feed rate value.
